

# SPANISH FOR CONSTRUCTION WORKFORCE

*Fundamentals*

Build stronger jobsite communication skills with practical, construction-focused Spanish training designed for real-world field interactions.

- ✓ Greetings & introductions on the jobsite
- ✓ Workplace courtesy expressions & basic conversations
- ✓ Countries, origins, & nationalities in multicultural settings
- ✓ Numbers & quantities used in construction settings
- ✓ Construction materials vocabulary
- ✓ Tools & PPE vocabulary
- ✓ Requesting materials, tools, & equipment
- ✓ Asking & answering common workplace questions
- ✓ Construction occupations & jobsite roles
- ✓ Basic supervisor & crew communication
- ✓ Pronunciation & listening practice
- ✓ Guided conversational activities & roleplays
- ✓ Real-world construction & workplace communication scenarios

August 4 - September 24, 2026

Tuesdays & Thursdays | 4:00 PM - 6:00 PM

This 32-hour Spanish program is designed specifically for construction and workforce professionals who want to develop practical Spanish communication skills for real jobsite interactions. Through instructor-led, highly interactive sessions, participants will build confidence using essential Spanish vocabulary and conversational structures commonly used in construction environments, workforce communication, and day-to-day field operations. The course emphasizes practical communication, participation, and workplace application rather than grammar-heavy instruction.
