Developing a Resilient Workforce

How Organizations Thrive in the Face of Adversity

Today's environment is filled with setbacks and unexpected challenges. VUCA (volatility, uncertainty, complexity, and ambiguity) is the new normal, and the impact of serious crises such as market shocks, governmental instability and pandemics can't be ignored. Few of us can change the environment in which we operate – but we can control how we prepare and respond to the events around us. Leaders who hope to accelerate performance and capitalize on change and uncertainty do so by creating a resilient organization that can "bounce back" and grow from adverse experiences.
